DETAILED ACTION

1. The previously indicated allowable subject matter has been withdrawn due to further consideration of the claims.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 13-18 and 20-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In step "a" the way the claim is written, "at least two...streams into at least two production zones...or into at least two...wells," it is confusing because it is not clear if applicant intends this to mean that two fluids are injected into each of the two zones or two wells or if one fluid into each for a total of two streams.

The first wherein clause is also confusing because it just seems to end. The "streams…are combined before recovering;" before recovering what and how. Further, is this the same "recovering" as is referred to in step "c".

Claim 23 is also considered to be indefinite because there are two different species within this claim. Injecting fluids into at least two zones is very different

physically and technically than injecting fluids into at least two wells and is considered to be patentable distinct therefrom.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
